## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 6. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to because Figure 1 contains lead lines with no reference characters. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 3682

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamazaki et al (US 5,243,856).

Yamazaki et al disclose a parking brake actuator for a motor vehicle, said parking brake actuator comprising, in combination: a fixed support (5); a lever (4) pivotably connected (5) to said support for movement between brake-releasing and brake-engaging positions (col. 1 line 52 - col. 2 line 35); a locking mechanism (27) adapted to releasably maintain said lever in said brake-engaging position; an electrical switch (15) having a blade (unnumbered see Fig 1) operable to indicate when said lever is out of said brake releasing position; and wherein said switch blade is secured directly to said fixed support (col. 3 lines 34-55).

Re claim 2, said fixed support forms a unitary mounting bracket for securing said switch blade to the fixed support (see Fig 1).

Re claim 8, said switch is located near a mounting hole formed in the fixed support which receives a fastener to secure the fixed support to the motor vehicle (see Fig 1).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-7, 11-15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamazaki et al (US 5,243,856) in view of Schantz et al (US 4,230,919).

Yamazaki et al disclose a switch as described above, having a fixed support forming a mounting bracket for securing the switch blade to the fixed support, but does not disclose the mounting bracket made of plastic, forming a slot for receiving a portion of the switch blade to secure the switch blade to the fixed support.

Schantz et al teach the use of a switch having a mounting bracket (12) made of plastic (col. 2 lines 64-68) and a terminal (see Fig 1), the mounting bracket forming a slot (see Fig 1) for receiving a portion of the switch blade (78) to secure the switch blade to the fixed support (see Fig 1).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Yamazaki et al to include a switch as taught by Schantz et al in order to reduce cost (col. 1 line 41 - col. 2 line 6).

Re claims 4 and 11, the method of forming the device (molding) is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight. See MPEP 2113.

***Allowable Subject Matter***

7. Claims 18-20 are allowed.
8. Claims 9 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
